PROJECT DESCRIPTION

The task of the final project is to develop a web application that supports the functionality according to the task variant.

Variants

Restaurant	There are roles: Client, Manager.
	The client (authorized user) places orders from the menu - the catalog of dishes, and also has the opportunity to view the catalog taking into account the sorting:
	- by the name of the dish;
	- by cost;
	- by category
	and filters the list of dishes by category. The customer, within one order, can order several identical dishes.
	The manager manages the orders: after receiving a new order, sends it for cooking. After cooking, the Manager passes the order for delivery. After delivery and receiving payment, the Manager changes the status of the order to "completed".
